

# Alphabet Test

Introduction Alphabet Test questions are based on the positions and arrangements of letters in the English alphabet series. They test a child's ability to:

- Recognise letter positions (forward & backward order).
- Rearrange letters to form meaningful words.
- Identify patterns and skipped letters.
- Pick the correct options based on the given clues.

Types of Alphabet Test

## Type I: Arrange letters to form a meaningful word

Use the given numbers (representing letters) to rearrange into a meaningful word.

**Example 1: Form a meaningful word by arranging the given numbers corresponding to the letters below.** Letter S E T B Number 1 2 3 4 (A) 4, 1, 3, 2 (B) 4, 2, 1, 3 (C) 4, 3, 2, 1 (D) 2, 4, 1, 3 Answer: (B) BEST

## Type II: Word formation from given letters

Check if an option word can or cannot be formed from the given letters.

**Example 2: Which word cannot be formed from letters of word MOTHER?**  
(A) OTHER (B) MORE (C) THEM (D) TOWER Answer: (D) TOWER

## Type III: Form a meaningful word from jumbled letters

Arrange the given jumbled letters to form a real word.

**Example 3: Form a meaningful word by arranging the given numbers corresponding to the letters below.** Jumbled letters: E T A B L Correct word = T A B L E Answer: TABLE

## Type IV: Identify skipped-letter patterns

Find the options where letters follow the same number of skips as the given letter sequence.

**Example 4: Check the sequence.**  
ACEG In which of the following sequences, the number of letters skipped between two adjacent letters is the same as the given sequence? (A) PQRS (B) MPRU (C) HJLN (D) OMKI Solution: In given Sequence ACEG, each letter skips 1 letter (B, D, F). So the pattern is to skip by 1. Sequence HJLN also follows same rule. Answer: (C) HJLN
